KSU COVID-19
Guidelines for Supervisors and Employees

As we return to campus for Spring 2021, our highest priority remains the safety and well-being of the campus community. This document provides details regarding preventative practices in the workplace, leave and telework options for employees impacted by COVID-19, as well as cleaning and disinfecting protocols.

KSU is committed to ensuring a safe campus. This guide will continue to be updated as new information is received. Employees should monitor the KSU Coronavirus website for the most current information.

Preventative Practices in the Workplace

- All employees are **required to carefully read the COVID-19 Campus Guide** prior to coming to campus.
- **Employees are encouraged to adhere to CDC guidelines at all times.** Environmental Health and Safety (EHS) has developed a toolkit of fliers for the workplace which can be found on the KSU Coronavirus webpage. You are encouraged to display this information in visible areas.
- Staff and faculty who are working on campus are required to self-monitor for symptoms prior to coming to work each day. **Anyone who has symptoms associated with COVID-19 infection should NOT come to campus** but instead should remain at home and contact his/her supervisor and Human Resources for further direction.

If you have any symptoms noted below you should remain at home and contact your health professional.

⇒ Cough
⇒ Running a fever
⇒ Runny nose or new sinus congestion
⇒ Shortness of breath or difficulty breathing
⇒ Chills
⇒ Muscle ache
⇒ Headache
⇒ Sore throat
⇒ Fatigue
⇒ New gastrointestinal symptoms
⇒ New loss of taste and/or smell

**Testing Options:** COVID-19 PCR testing will be available for asymptomatic faculty/staff and rapid antigen testing will be available for faculty/staff experiencing COVID-19 related symptoms. Testing will begin on both campuses on Monday, January 4th and no appointment is necessary. The costs associated with testing will be billed to everyone’s insurance provider.

- **Kennesaw Campus**
  ⇒ Monday-Friday: 8am-12pm
  ⇒ 3217 Campus Loop Road
  ⇒ In the garage in the former Hospitality House

- **Marietta Campus**
  ⇒ Monday-Friday: 1:30pm-3:30pm
  ⇒ Outside of the entrance to the Student Recreation Center. Adjacent to the Student Health Clinic.

We will continue to work with Cobb/Douglas Department of Public Health to offer free drive thru testing on each campus during the week. Please check the [KSU Coronavirus webpage](#) as dates and times vary.

- Faculty and staff **should not come to campus** if:
  ⇒ The staff or faculty member has symptoms associated with COVID-19 infection.
  ⇒ The staff or faculty member **has been diagnosed** with COVID-19 or
  ⇒ The staff or faculty member has been contacted by the Georgia Department of Public Health and has been advised/directed to self-quarantine due to close contact with anyone who has a confirmed COVID 19 diagnosis. Faculty or staff members who **begin to**
experience COVID 19 symptoms while at work should leave work and contact their supervisor and Human Resources.

⇒ The staff or faculty member has been in close contact with someone who has been diagnosed with COVID-19. You should monitor your health for fever, cough and shortness of breath during the 14 days after the last day you were in close contact with the sick person with COVID-19. While the CDC still recommends 14 days of quarantine for a person who has been identified as a close contact with a person who tested positive for COVID-19, the following options to shorten quarantine are acceptable:

- Quarantine can end after Day 10 without testing and if no symptoms have been reported during daily monitoring.
- When diagnostic testing resources are sufficient and available, then quarantine can end after Day 7 if a diagnostic specimen tests negative and if no symptoms were reported during daily monitoring. The specimen may be collected and tested within 48 hours before the time of planned quarantine discontinuation (e.g., in anticipation of testing delays), but quarantine cannot be discontinued earlier than after Day 7.

⇒ The Department of Public Health defines close contact as:

- Living in the same household as a sick person with COVID-19;
- Caring for a sick person with COVID-19;
- Being within 6 feet of a sick person with COVID-19 for a total of 15 or more minutes in a 24-hour period; OR
- Being in direct contact with secretions from a sick person with COVID-19 (e.g., being coughed on, kissing, sharing utensils, etc.)
When can a faculty or staff member return to work if they have been diagnosed with COVID-19?

- Persons who have had COVID-19 symptoms and tested positive may discontinue isolation when all of the below conditions are met:
  ⇒ At least 10 (ten) days have passed since symptoms first appeared AND
  ⇒ At least 24 hours have passed since last fever without the use of fever-reducing medications AND
  ⇒ Symptoms (e.g., cough, shortness of breath) have improved

- Persons who have NOT had COVID-19 symptoms but tested positive and are under isolation may discontinue isolation when:
  ⇒ At least 10 (ten) days have passed since the date of the first positive COVID-19 diagnostic test assuming they have NOT subsequently developed symptoms since their positive test.
High-Risk Employees

While everyone is susceptible to COVID 19 infection, CDC Guidelines state that individuals with certain conditions may be at a higher risk. These conditions include:

- Chronic kidney disease
- COPD (chronic obstructive pulmonary disease)
- Immunocompromised state (weakened immune system) from solid organ transplant
- Obesity (body mass index [BMI] of 30 or higher)
- Serious heart conditions, such as heart failure, coronary artery disease, or cardiomyopathies
- Sickle cell disease
- Type 2 diabetes mellitus
- Asthma (moderate-to-severe)
- Cerebrovascular disease (affects blood vessels and blood supply to the brain)
- Cystic fibrosis
- Hypertension or high blood pressure
- Immunocompromised state (weakened immune system) from blood or bone marrow transplant, immune deficiencies, HIV, use of corticosteroids, or use of other immune weakening medicines
- Neurologic conditions, such as dementia
- Liver disease
- Pregnancy
- Pulmonary fibrosis (having damaged or scarred lung tissues)
- Smoking
- Thalassemia (a type of blood disorder)
- Type 1 diabetes mellitus
Faculty or staff who have one or more of the conditions mentioned above and who have been given instruction from their supervisor to return to campus, may request accommodation by contacting HR. Please note that medical documentation will be requested by HR to support your request. Personal medical information should not be shared directly with your manager or co-workers. As necessary, HR will consult with managers regarding the provision of an accommodation.

Please note the University’s accommodations process addresses workplace accommodations directly related to the employee (one’s self) and their job functions. Based upon guidance from the USG, the University’s accommodation process can only be used to address COVID-19 related concerns related to your own medical conditions and risk factors. If you wish to seek leave related to the care of others, please contact your Benefits Specialist to discuss the option of leave under the Family Medical Leave Act (FMLA).

**Leave Options for Employees Impacted by COVID-19**

If you are ill with COVID-19, are experiencing symptoms of COVID-19 and are seeking a medical diagnosis, are subject to a federal, state, or local quarantine or isolation order, or are advised by a health care provider to quarantine in connection with COVID-19 and thus are unable to work, please contact HR with questions or additional information regarding leave options.
Positive Cases on Campus

- Employees diagnosed with COVID-19 should complete the self reporting form, or contact HR by email, or by calling 470-578-5889. The COVID Response team will be notified and will disinfect and conduct a deep cleaning of the impacted work area(s) if needed. The Georgia Department of Public Health (DPH), in conjunction with the KSU COVID Response Team, will be the agency responsible for determining if it is necessary to reach out directly to any employee who has had close contact with the employee diagnosed with COVID-19 and provide specific instructions on testing and self-quarantining. KSU will follow the direction of DPH if notified that an employee has been diagnosed with COVID-19. If you are aware of an individual in your area who has tested positive and you have not been contacted by DPH or the KSU COVID Response Team, then you may continue to come to work and self-monitor for symptoms. Should you begin showing any symptoms, you are required to stay home, notify your supervisor and HR, and contact your health professional.

- Persons who have had COVID-19 symptoms and tested positive may discontinue isolation when all of the below conditions are met:
  
  ⇒ At least 10 (ten) days have passed since symptoms first appeared AND
  
  ⇒ At least 24 hours have passed since last fever without the use of fever-reducing medications AND
  
  ⇒ Symptoms (e.g., cough, shortness of breath) have improved
• Persons who have **NOT** had COVID-19 symptoms but tested positive and are under isolation may discontinue isolation when:

⇒ At least 10 (ten) days have passed since the date of the first positive COVID-19 diagnostic test assuming they have **NOT** subsequently developed symptoms since their positive test.
Managers should continue to adhere to social distancing standards and consider physical layout of the workplace as they create staffing plans.

- **Remote Work/Teleworking:** While many staff have returned to their regular worksite some degree of telecommuting (in full or partial day/week schedules) may continue be an option, with supervisor approval, for those who can work remotely to fulfill some, or all of their essential responsibilities. Employees continuing to telework will be required to abide by the updated Teleworking Program Guide and complete a Telework Agreement. Additional resources regarding teleworking can be found [here](#).

- **Alternating/Rotating Schedule:** In order to limit the number of employees on campus and to enable social distancing, departments should schedule alternating or rotating days for staff in congested areas or where staff share a workspace.

- **Staggered Shifts/Flextime:** Staggering starting and ending times in 30-minute increments will reduce traffic in common areas and will aid in social distancing.

- **Compressed Work Weeks** – Working a full schedule in fewer days than normal (e.g., working 4 ten-hour days instead of 5 eight-hour days) is also an option to reduce traffic on campus.
**Face Masks:** The University System of Georgia institutions require faculty, staff, students and visitors to wear an appropriate face covering while inside campus facilities. Face coverings will be worn in addition to and not as a substitute for social distancing. Face coverings aren’t required in one’s own dorm room or suite, when alone in an enclosed office or study room or in campus outdoor settings where social distancing requirements are met. Face masks should be worn in open work areas where others may walk through, as well as in cube settings where others may be within 6 feet (share a cube wall, etc.).

Anyone not using a face covering when required will be asked to wear one or leave the area. Masks will be available in nearly all campus buildings. Go to [https://oem.kennesaw.edu/mask-locations.php](https://oem.kennesaw.edu/mask-locations.php) to find the nearest location. Repeated refusal to comply with the requirement may result in discipline through the applicable conduct code for faculty, staff or students. Concerns about students, faculty or staff not complying should be brought to the appropriate department:

- **Students:** Student Affairs, Office of Student Conduct at [scai@kennesaw.edu](mailto:scai@kennesaw.edu) or 470-578-3403
- **Faculty/Staff:** Human Resources ([return2campus@kennesaw.edu](mailto:return2campus@kennesaw.edu))

Reasonable accommodations may be made for those who are unable to wear a face covering for documented health reasons. Requests should be submitted to [return2campus@kennesaw.edu](mailto:return2campus@kennesaw.edu).

Employees are highly encouraged to bring their own cloth face covering to work. KSU will maintain a supply of disposable face masks.
• **Supplies:** Supervisors may pick up disposable masks and cleaning supplies for their department at the following locations between 8am-Noon, Monday-Friday:

  **Kennesaw Campus** – COVID Operations Center, 3217 Campus Loop Road, Kennesaw

  **Marietta Campus** – Office of Emergency Management, Department of Public Safety, Norton Hall

  Supervisors should email oem@kennesaw.edu in advance with the number of masks requested and time when they will pick them up. Disinfectant spray and paper towels will also be provided for employees to clean their workspaces and common equipment (copiers, etc). Supplies are limited and for office use only.

• **Social Distancing:** People can be asymptomatic and spread the virus, so it is important to maintain appropriate social distancing (six feet or greater). This is especially important for those people who are at a higher risk for becoming ill.

  ![Social Distancing Illustration]

• **Staff on campus should follow these social distancing guidelines:**
  
  ⇒ Avoid close face-to-face contact with others by staying at least 6 feet apart at all times.

  ⇒ Wear face coverings inside all KSU facilities and in public areas where you could come in contact with others

  ⇒ Avoid handshaking.
⇒ All breakrooms, kitchens and common areas will remain closed. There will be no access to refrigerators, microwaves and coffee makers in break or common areas. Employees are encouraged to eat meals at their desks or away from the office.

- **Handwashing:** Employees should wash their hands using soap and water frequently, washing for at least 20 seconds, especially after you have been in a public/common area; after coughing, sneezing, blowing your nose or touching your face. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Additional guidance on handwashing is available from the CDC.

- **Elevators:** Employees should comply with capacity signage in the elevators and always wear a face covering. When possible, employees should use the stairs.
• **Office Environments:**
  - If you work in an office, **no more than one person** should be in the same room unless you can maintain the required minimum of 6-feet distance. If more than one person is in a room, everyone is required to wear face coverings.
  - Masks are required to be worn by all staff in a reception area.
  - Department managers should consider traffic flow patterns within an office area and determine if one-way traffic can be accommodated to reduce face-to-face contact as much as possible.
  - In areas where queuing is common practice (Financial Aid, Admissions, Bursar, etc.), signage will be placed on the floor to indicate where people should stand while waiting in line. Please [contact Facilities](mailto:facilities@kennesaw.edu) if your space needs social distance signage.

• **Shared Workstations:** Employees should not use other employees’ workstations, phones or other equipment. In rare instances where this may be necessary, the equipment should be sanitized before and after use.

• **Travel:** All non-essential, KSU-sponsored travel continues to be prohibited at this time. Exceptions must be approved by the President or the Provost.

• **Meetings & Events:** Meetings and Events will remain in a “REMOTE FIRST” approach where virtual options will continue to be encouraged whenever the outcome of the meeting will be minimally impacted. Capacities of rooms across both campuses have been analyzed and reduced to accommodate social distancing. Please visit the [Events website](http://events.kennesaw.edu) for additional guidelines.
Visitors should be advised to wear face masks and steps should be taken to maintain social distances.

- Limit entry and exit options.
- Designate one-way paths where possible.
- Limit or remove chairs.
- Plexiglass barriers have been installed where social distancing is not possible. If your department may require a plexiglass barrier, please email facilities@kennesaw.edu to request a physical barrier assessment form.
- Hand sanitizer stations have been placed around campus in high-traffic areas.
- High-touch items such as magazines, pens, etc. should be removed from waiting areas.
- Where possible, seating in common areas should be temporarily removed or cordoned off to prevent usage. Otherwise the chairs/seats must be cleaned/disinfected frequently.
Cleaning & Disinfecting Practices

- KSU cleaning protocols align with CDC and USG guidance. High-traffic/high-touch areas will be professionally cleaned and disinfected multiple times per day.
- Hand-sanitation stations are located across campus and will be replenished often.
- Where possible and safe, we encourage you to leave doors propped open so staff will not need to touch door handles. To request a doorstop, email facilities@kennesaw.edu. Supervisors may request that controlled access be removed from a door if it will not compromise the security of employees or sensitive information. Email dooraccess@kennesaw.edu to make this or other access requests.
- Restroom doors should NOT be propped open.
- Employees should **wipe down commonly used equipment** (e.g., copiers, printers, fax machines) before and after use. Disinfectant can be pick up at the Office of Emergency Management, and by emailing oem@kennesaw.edu
- Employees will be encouraged to **clean their workstations daily**. Disinfectant and paper towels will be provided. Cleaning supplies are limited and for office use ONLY.
- Custodial staff will only be vacuuming private offices once per week and will not be entering private offices daily to empty the trash. All employees will be responsible for emptying their trash at a central location in their office suite. Guidelines on self-recycling and trash disposal can be found on the [KSU Coronavirus website](#).
- If you have a concern or request regarding sanitation practices, contact Building Services by email or at 470-578-6224.
Employee Assistance Program Resources for both Supervisors and Employees

All staff and faculty are able to access the comprehensive resources offered through our Employee Assistant Program (EAP). By utilizing the company code “USGcares”, employees can reference a wide range of resource topics such as health information, financial and legal services, child and/or elder care assistance, anxiety and coping strategies, as well as best practices for managers.

The EAP is available 24/7/365 both online and via telephone consultations. To speak with a representative, call KEPRO at 1-844-243-4440. Online articles, self-search locators, health/wellness modules, webinars and self-paced eLearning are all available at www.eaphelplink.com. Employees are encouraged to utilize the search engine within this site to review the many articles recently published to address the varied aspects of how COVID-19 can impact life both at work and at home.

Employee Resources

As stated at the beginning of this guide, safety is our highest priority. Practicing social distancing and good hygiene are the most basic, but important, steps that you can do to help. It is vital for all employees to remain home if they are not feeling well or if they experience any COVID-19 or other influenza like symptoms. Finally, if you or a colleague are experiencing severe shortness of breath or other potential life threatening symptoms, please immediately call 911 or KSU Public Safety at 470-578-6666.
Frequently review the following sites for updated information on how to stay safe during this pandemic:

**Centers for Disease Control**
